

SmartSoil Energy launches its new web site

Montreal, Quebec, September 21st, 2006 –In response to the growing demand for information on SmartSoil-Biogas process and company, SmartSoil Energy revamps its image and launches its new web site. The site will ensure a permanent presence while providing rich and varied contents. Should you want to learn the latest news about SmartSoil or its representatives' whereabouts, please visit the site regularly. We hope you will enjoy it.

The site was designed by Martin Larrivée from Imagine Web, a Canadian multi-media company. Photographer Jean-François Pelchat provided images of our installations and our personnel. French and English proofreading was done by Rédaction traduction conseil GB. The Spanish version is the work of Gladys Ortiz (SmartSoil Energy). The artistic direction, copywriting as well as coordination were carried out by the SmartSoil's Marketing department, with the support of all SmartSoil staff.

SmartSoil Energy Inc. is a leading provider of clean energy technology, developed by its parent company Soconag, in the worldwide campaign towards climate protection. SmartSoil does so by providing innovative solutions for transforming "problem biomass" into clean gaseous fuel, primarily through landfill-gas-to-energy initiatives. Its patented and certified technology provides unprecedented monitoring and control capabilities. For more information, visit us at www.smartsoil.com.
